## SKILLS

- AI models and agents**  
OpenAI · Claude · Gemini ·  
LangChain · LangGraph · Whisper
- AI-assisted development**  
Claude Code · Antigravity · VS Code  
· GitHub · Git
- Automation and integration**  
n8n · APIs REST · Webhooks ·  
WhatsApp · Docker
- Data and BI**  
SQL · Python · Pandas · scikit-learn  
· Power BI · DAX · Power Query ·  
Microsoft Fabric · Looker
- Data engineering and cloud**  
BigQuery · dbt · Google Cloud ·  
PostgreSQL · SQL Server · ETL

## EDUCATION AND PUBLICATION

- MBA in Data Science and Analytics**  
University of São Paulo  
(USP/ESALQ) · 2024 — 2025
- Paper published at SBPO 2025**  
57th Brazilian Symposium on  
Operations Research · 2025
- B.Eng. in Mechanical Engineering**  
Federal University of Ceará · 2016  
— 2021

# Thomas Barbosa

## DATA, AI & AUTOMATION SPECIALIST

### SUMMARY

I lead the Data & AI team at Grupo Raposo Plásticos: 11 AI agents and 56 active automations returning ~142 h/mo to teams and cutting tooling costs by ~80%, from the ERP to decision dashboards. Before that, pricing and market intelligence at Solar Coca-Cola and BI at Arco Educação.

### EXPERIENCE

- Data Specialist · Data & AI team lead · Grupo Raposo Plásticos** 2025 — present  
I lead a team of 3 serving the group's five plants: an AI agents hub, n8n automations, Hub Forms for the shop floor and in-house platforms replacing Power Apps and Power BI, with no new licences, a read-only ERP and data governance.
- Senior Pricing Analyst · Solar Coca-Cola** 2024 — 2025  
Market Intelligence Analyst (Mar 2024 — Apr 2025)  
Market intelligence and Revenue Growth Management: SQL over Scanntech and Nielsen retail data, ETL from many sources to anticipate revenue risks and opportunities, and Power BI dashboards that guided portfolio pricing.
- Projects and BI Analyst · SAS Education Platform · Arco Educação** 2020 — 2024  
Projects Analyst I (Apr 2021 — Dec 2023) · Assessment Management Intern (Mar 2020 — Apr 2021)  
Production data for teaching materials in SQL Server (procedures and SSIS) and BigQuery; productivity, cost and quality dashboards in Power BI and Looker for coordinators and managers; and Python and SQL automations that removed manual routines from the management team.
- CEO · EXPeduca** 2017 — 2021  
COO (Aug 2017 — Mar 2019)  
Ran operations and later the company, part-time, while in university.

### SELECTED PROJECTS

- AI agents hub** · Python, LLMs, SQL, PostgreSQL, Docker  
11 AI agents for HR, treasury, accounting, banking, management and manufacturing, reading the ERP, MES and spreadsheets with a date and source on every number; AI routes, code executes. Found 622 misconfigured ledger records live and corrected the real hour-bank balance.
- BI dashboards and data pipeline** · Power BI, Looker, dbt, DAX, BigQuery  
50+ dashboards in Power BI and Looker Studio; the manufacturing ones cover production, OEE, downtime, inventory, costs and traceability, on a pipeline with extraction, raw layer, dbt, tests and a dimensional model.
- Hub Forms: the shop floor in the single source of truth** · Next.js, NestJS, PostgreSQL, TOTVS Protheus, FlowPilot  
Mobile-first web app for gatehouse, logistics, production, quality and training: invoice pulled from TOTVS Protheus, blind weighing, loading orders capped by batch balance, official form as PDF and QR-code attendance, in the same database as FlowPilot, the plant dashboard and the AI.
- 135 n8n automations (56 active)** · n8n, BigQuery, Graph API, Gotenberg  
56 active routines connecting the ERP, BigQuery, Microsoft 365 and Google, delivering images, PDFs and tasks with deadlines over WhatsApp and email every business day: ~142 h/mo returned to teams and invoice-receipt checks across 3 plants without opening a PDF.

### HOW I WORK

I start with the pain, not the tool · Driven by challenge · Data you can trust · AI supports, people decide.
